

# Telephone Intercom and Access Control System EL1SS

EL1SS

## Simplicity. Durability. Exceptional Value.

The **EL1SS** Telephone Intercom and Access Control System provides wired telephone intercom communication and secure access control at the gate or door. It is easy to install, and its rugged stainless steel housing provides reliable, durable performance year after year—at a price everyone can afford. With the EL1SS, residents or small businesses can simply communicate with visitors and grant or deny access, all from the convenience of their phone.

### TOP 5 FEATURES

- Call forwarding
- Call waiting
- Party mode to keep the entrance open
- “Do not disturb” mode for added privacy
- Auto-call feature that enables immediate notification when a guest pulls up to the gate (requires optional presence sensor)

### ADDITIONAL FEATURES

- Easy to program from the keypad—no software needed
- Connects directly to an existing residential home phone line; no additional monthly expenses are incurred
- Designed with a hinged faceplate that saves an average of 10 minutes on installation time
- Intercom mode allows for communication between the unit and a resident’s phone without the expense of paid telephone service
- Compatible with DSL phone lines
